Instructions and receipes for mixing punches in quantities for a large number of guests at parties or receptions.

For mixing punches in large quantities, endeavor to obtain a mixing vessel of agate ware or porcelain lined. When all the ingredients for the punch have been put into the mixing vessel, stir with an oaken paddle and set the mixture in the ice box and let it stand not less than six hours, not more than ten.

Put no ice in the basic mixture. When the time arrives to serve the punch add the carbonated water or champagne if they are called for in the recipe.

When serving punches place on the serving table a punch bowl of sufficient capacity for the occasion and keep mixing vessel convenient in order the serving bowl may be replenished as required.
